Our Commitment...

It is our commitment to an unending quest for excellence that makes a Caesar Guerini unique from all other Over and Unders. You can see it in the wood-to-metal fit, the deep lustrous bluing, and the flawless 26 lines-per-inch checkering. You can feel it in the precision of the internal parts machined from billet steel, as well as the lively balance and handling of our guns. Every Caesar Guerini shotgun goes through no less than 256 quality control checks assuring our product exceeds the demands of our customers.

Our real commitment to our customers is not in simply providing the best product possible. It is also in giving them a level of unprecedented customer service. From our industry leading warranty and ground breaking Pit Stop program, to our timely service measured in days not months. We strive to leave every customer, a satisfied customer. That is the Caesar Guerini commitment.
All Caesar Guerini shotguns, including the light models, undergo the 1320-bar high-pressure test at the Italian National Proof House.

Caesar Guerini shotguns are backed up with a limited lifetime warranty and the acclaimed Pit Stop service program.

Light weight models feature forged aluminum frame and fore-end.

3" chambers (except 28 gauge)

26 lines-per-inch checkering

65 lines-per-inch (Easily removed for cleaning)

Left hand, English straight, and custom stocks are available

Precision fit wood butt plate

Disc ejector stops

Oversized extractor cams

Extra heavy duty ejectors

Anson push button fore-end release

Multi gauge combination sets are available

Automatic safety (Optional)

Chrome lined chambers and bores

Lives without an oil finish, applied by hand

A special proprietary polishing process results in a deep lustrous blued finish

Screwless and pinless blind side plates

High performance nickel plated choke tubes. (5 included)

The fore-end incorporates an interchangeable insert in special hardened steel that makes it easy to tighten the shotgun if it becomes loose through years of very heavy use

Durasight clear protective finish.

Replaceable trunnions and locking lug

Extra heavy duty ejectors

Disc ejector stops

Oversized extractor cams

Left hand, English straight, and custom stocks are available

Precision fit wood butt plate

Anson push button fore-end release

Chrome lined chambers and bores

Screwless and pinless blind side plates

High performance nickel plated choke tubes. (5 included)

3" chambers (except 28 gauge)

26 lines-per-inch checkering

The fore-end incorporates an interchangeable insert in special hardened steel that makes it easy to tighten the shotgun if it becomes loose through years of very heavy use

Hammers and sears are precision machined from billet steel to ensure crisp trigger pulls

At Caesar Guerini upland bird hunting is a passion. We wanted a gun that would truly reflect our love of fall coverts, autumn foliage, wet gundogs, and the smell of wood smoke. The Woodlander is the shotgun you imagine in such a setting. It was created to be a classic upland game gun for tight cover and fast-flushing birds. The color case hardened action exudes an understated elegance. It is embellished with a single gold ruffed Grouse executed in the Bulino style while nicely figured Turkish walnut featuring a traditional oil finish speaks of quality from a bygone era. The meticulously fitted wood butt plate allows for snag-free gun mounts and adds a custom look and feel. The Woodlander is also offered with an optional English straight stock. The lightweight barrels incorporate solid mid ribs to keep out debris, 7mm top rib in 12 gauge and 6mm top rib in sub gauges. If your priorities are traditional good looks and superior handling, then the Woodlander is the gun for you.

Chosen by the Editors of Field and Stream Magazine as “Best of the Best” in Shotguns, the Tempio is designed to be a sleek and fast pointing shotgun in the field, the perfect companion for upland game hunters. Its low-profile receiver matched with a trim stock, classic Prince-of-Wales grip and schnable fore-end make the gun a perfect match for fast game birds. In the constant pursuit of perfection Caesar Guerini has decided to give the Tempio and Tempio Light a makeover. Utilizing advancements in metal finishes, the new Tempio features upgraded engraving on a hand polished coin finish action. The Tempio Light incorporates Guerini’s proprietary process for engraving an alloy action shotgun with fine engraving. Both models are additionally finished with Invisalloy™ for additional protection. On the mechanical side, the trigger is upgraded to a more elegant shape while also improving the trigger pull. The result is a fast handling game gun made in the classic tradition of fine shotguns.
The Maxum is a true collector grade shotgun which will become an heirloom that can be passed down for future generations to enjoy. The action features an elegant coin finish enhanced by deep relief Italian ornato style scrollwork. Hours of hand engraving by the talented craftsmen from the world renowned Italian engraving house, Bottega Incisioni C. Giovanelli, enhance the finest details. Our Invisalloy™ finish is applied to all external surfaces of the action to provide rust resistance and offer ease of care. Balancing the beauty of the deeply sculpted engraving is a deluxe grade of Turkish walnut, featuring the precision cut 26 lines-per-inch checkering and a natural oil finish that is hand rubbed to a stunning sheen. All of these enhancements result in what can only be appreciated as a functional and elegant work of art.

The New Magnus is designed to appeal to the discriminating hunter who appreciates a classic shotgun with timeless qualities. The elegantly sculpted sideplate receiver features upgraded engraving with ornamental scroll and gold game scenes against a richly case colored finish while the Magnus Light features a brilliant nickel finish. The unique sideplates have no pins or screws allowing for a perfectly smooth receiver with uninterrupted engraving. The Magnus series receives a deluxe grade Turkish walnut stock with a traditional hand rubbed oil finish to enhance the highly figured grain. The meticulously fitted wood butt plate allows for snag-free gun mounts and adds a custom look and feel. Best of all, Caesar Guerini is bringing you these significantly enhanced features without enhancing the price.
At Caesar Guerini we have a driving passion for innovation and elevating the gunmaker’s art, and this commitment to quality has produced the Apex. It has distinctly British lines with a trim pistol grip and our trim, rounded fore-end, but what really sets this gun apart is its revolutionary new full-length trigger guard. We’ve eliminated the screws for a clean, seamless look, and the end of the guard terminates in a perfectly fitted skeletal grip cap for a touch of elegance. The action is embellished with full-coverage engraving that incorporates no fewer than four different techniques, and the frame’s hand-polished coin finish is treated to our Invisalloy™ coating, which makes the metal rust resistant while enhancing the contrast in the engraving. The Apex features a classically British style stock including a rounded fore-end for a sleek but functional profile.

Making an investment quality field shotgun like the Forum requires an unrelenting passion for precision, premium quality and attention to the smallest details available only from the best of skilled craftsmen and gunsmiths. The results can not be produced by even the most sophisticated computer controlled machines. Each Forum shotgun we create incorporates numerous hours of skilled hand labor. The engraving on the Forum has been enhanced to include more coverage and detail. The Forum Field also features our new revolutionary full-length trigger guard that is notably missing any screws for a clean seamless look. The end of the trigger guard terminates in a perfectly fitted skeletal grip cap, making for a uniquely elegant appearance. The Forum stock has a classic Prince-of-Wales style grip which matches perfectly with our trim rounded fore-end giving the gun distinctly British lines. The stock is completed with exactly cut extra fine checkering, checkered butt and a hand rubbed oil finish.
The Caesar Guerini Ellipse series represents the next generation of the upland game gun. With a graceful rounded action and streamlined stock it handles, feels and looks like the world’s best handmade round body shotguns. We obsessed over every aspect of the design, from the graceful lines of the stock to details as obscure as the shape of the trigger. This is not a quick makeover of our existing models; the barrels, action and stock are all different. The Ellipse is embellished with an understated border engraving pattern that is complemented in silver coin finish with our Invisalloy™ protective coating. The stock is crafted from semi-deluxe Turkish walnut and enhanced by a hand rubbed oil finish. The result is an elegant round body shotgun reminiscent of fine British guns from years gone by.

Fast as a Grouse’s wing tip, sleek as a Pheasant’s tail feather - the Caesar Guerini Ellipse EVO represents the next generation of upland game gun. With graceful rounded action and streamlined stock it handles, feels and looks like the worlds best handmade round body shotguns. We obsessed over every detail from the engraving created to accentuate the curve of the action to something as obscure as the shape of the trigger. This is not a quick makeover of our existing models; the barrels, action and stock are all different. The Ellipse is simply the evolution of the fine Over and Under hunting gun. With the EVO Light less is more. Less weight with an alloy action incorporating special stainless steel breech inserts for extended durability. Revolutionary engraving and metal finishing techniques were developed to bring out the depth and contrast in the EVO light engraving. The result is beauty rarely seen in alloy action guns.
All Caesar Guerini shotguns, including the light models, undergo the 1320-bar high-pressure test at the Italian National Proof House.

Rebounding hammers Interceptor sears

Hammers and sears are precision machined from billet steel to ensure crisp trigger pulls.

Oversized extractor cams

Extra heavy duty ejectors (Easily removed for cleaning)

DTS adjustable comb is available as an option on every model

The Summit Sporting is an efficient tool designed to accomplish only one task: breaking targets. Every feature is carefully conceived and executed. The receiver is designed to withstand a lifetime of competitive shooting. When you compare the thick receiver walls and large bearing surfaces with any other Over and Under, it becomes clear this gun is designed for durability. No matter how unlikely they are to wear out, the trunnions and locking lugs can be easily replaced. The stock includes palm swell, cast off, and toe rotation for either a right or, as an option, a left hand shooter. Each barrel length is designed to balance perfectly while allowing stability, and the 12 gauge models feature our Maxis Bore/Choke System. Our small gauge sporters are even offered with 32" barrels. The elegantly sculpted boxlock receiver is embellished with a neo-modern style engraving created by world famous master engraver Dario Cortini.

The Summit Limited embodies all the balance, quick handling and accurate performance qualities of the popular Summit Sporting and adds a deluxe grade of oil finished, hand rubbed Turkish walnut with a richly colored case hardened receiver to create a stunning sporting Over and Under. The same weight, feel and clay crushing performance of the standard Summit Sporting are inherent features of the Summit Limited. The 12-gauge version incorporates Caesar Guerini’s Maxis Bore/Choke System for enhanced performance. This new barrel incorporates a .725 bore diameter with a longer choke system calibrated to the larger bore. The 12 gauge stocks have also been reconfigured to offset the slight increase in barrel weight. The 12 gauge models are offered in 30 and 32 inch lengths while small gauge models are available in 30 and 32 inch. A two-barrel 20/28 gauge combo set is available as well as a three-barrel 20/28/.410 set.
The Summit Ascent is everything you want from a modern sporting clays shotgun without the additional cost of an adjustable point-of-impact rib. The 10mm high tapered top rib is designed to shoot at 50/50% point-of-impact allowing for an upright shooting position and improved target visibility, making it the perfect sporting clays gun. Additionally, the rib is tapered from 10mm to 8mm at the muzzle. The Monte Carlo style stock incorporates the DTS adjustable comb to make sure a variety of shooters can adjust the gun to fit precisely. The mass in the stock and barrels are engineered so the gun will balance perfectly while the DTS Kinetic Balancer and barrel weights are available as an option to fine tune the Ascent to any shooter’s style. With a long list of winning features the Ascent is taking sporting clays to the next level.

Seems as though all you hear about these days is the word change; changing your diet, changing your job, changing your mind. While not all change is good, it is the only means to progress. So we decided to analyze what we could do to make one of our most popular guns even better. Staying with the same general theme, we dramatically improved the engraving. Then we removed some weight from the muzzle end of the barrels to make the gun handle better. Additionally, we created a new top rib featuring an 8 to 10mm taper and gracefully sculpted the rib posts. Finally, we reshaped the stock and increased the mass for enhanced recoil reduction. The only thing that did not change is the price. Now that is progress at its finest.
Some shooters accuse Caesar Guerini of focusing on the cosmetics of our guns. Our reply is "guilty as charged". It is our policy to pursue excellence in all aspects of our firearms, both what can be seen and what you experience when you pull the trigger. The Challenger grade has been designed to appeal to the target shooter with a bold Acanthus leaf pattern on a fine Inglesina scroll background. All of the hand polished coin finished metal surfaces are finished in Invisalloy™ protective finish for years of carefree service. Additionally, the new Challenger comes standard with the DTS trigger system that reduces trigger pull weight and creep. The aesthetics of a gun might not be the most important issue, but life is too short to shoot an ugly gun.

The Challenger Ascent is the natural progression of the extremely popular Ascent line of target shotguns. We have upgraded the Ascent with a bold Acanthus leaf engraving motif on a fine Inglesina scroll background. The stock dimensions are unchanged, but the wood has been upgraded to a deluxe grade of Turkish Walnut. All Ascent models feature a 10mm high fixed rib and Monte Carlo stock that allows the shooter to utilize a more upright shooting posture while still retaining the instinctive pointing qualities of a flat-rib sporting clays gun. The result is an modern sporting gun that accommodates both pre-mounted and gun-down shooting styles while remaining very comfortable to shoot.
The Maxum Sporting is truly a stunning Over and Under shotgun. The deep relief Italian ornato scroll hand finished engraving on the receiver, side plates, and fore-end assembly make this sporting gun unique among others on the clays course. The handwork and design are from the studios of the world renowned Italian engraving house, Bottega Incisioni C. Giovannelli. The coin finish frame is painstakingly hand polished. Balancing the beauty of the deeply sculpted engraving is a deluxe grade of Turkish walnut, featuring precision cut 26 lines-per-inch checkering and a natural oil finish, hand rubbed to a sheen that enhances the highly figured wood grain. The Maxum Sporting is available in 12, 20 and 28 gauge; 12 gauge models feature the Maxis Bore/Choke System and are offered in barrels up to 34” for the serious competitor. Combination two-barrel sets in 20/28 gauge and three-barrel 20/28/.410 gauge sets are also available.

The same passion for innovation that created the Apex field gun went into the design of the new Apex Sporting. This model’s high-grade Turkish walnut stock gets a classic oil finish, and the matching fore-end has a trim, rounded profile for perfect balance and handling. The stock also features our revolutionary full-length trigger guard that dispenses with screws to produce a clean, seamless look, and for a touch of elegance the guard terminates in a perfectly fitted skeletal grip cap. The action is embellished with full-coverage engraving that employs no fewer than four different techniques to attain the desired result. The frame is rendered in a hand-polished coin finish with our Invisalloy™ coating that makes the metal rust resistant and at the same time enhances the contrast in the engraving.
The Forum Sporting Over and Under reflects our relentless passion for precision, premium quality and attention to the smallest details available only from the best of skilled craftsmen and gunsmiths. The Forum Sporting is in a class by itself, a remarkable creation that combines the legendary Italian gunmakers' craft with technologically advanced manufacturing processes to produce a firearm that truly is a work of art. Each Forum created incorporates numerous hours of skilled hand labor. Every surface is hand polished, even many areas hidden from view, and every Forum's components are hand fitted to insure flawless operation. The premium coin finished receiver and side plates are embellished with full coverage hand engraving featuring Bulino style game scenes framed in a graceful floral scroll. The Forum Sporting also incorporates a full tang trigger guard with hand engraving and is meticulously inletted into a stock of premium grade Turkish walnut.

The choice of Sporting Clays World Champion Richard Faulds MBE, the EVO Sporting is a classic sporting clays gun in every sense of the word. If you like a high rib and lots of adjustability this is not the gun for you. The EVO Sporting is designed to offer the ultimate in a natural and instinctive pointing shotgun. The trim lines of the classic style stock and flat tapered rib allows the gun to point where you are looking, every time. Based on our Ellipse round body action the EVO Sporting has a slightly wider receiver that concentrates the weight between the hands. The result is a gun with world class handling, designed for the world's best shooters.
To evolve you need to focus on how change can bring improvement. The game of Sporting Clays is changing and more importantly so is the shooter. Equipment must keep up with the demands of the sport and that is exactly what the new Evolution Sporting accomplishes. The Evolution’s new wider frame with thicker walls add strength and durability. The new rib geometry enhances rigidity and a centrally located rib stabilization system reduces flex and vibration. Not only is the unique rounded action visually attractive, but it also distributes recoil forces between the stock and frame more efficiently making for a more durable and low recoiling shotgun.
**DTS Rib** adjusts from a 50/50 to 90/10% pattern by simple turning one screw.

Selective and non-selective triggers are available.

5” long dual conical forcing cones for reduced recoil and improved patterns.

17mm tall DTS rib allows for a more upright and comfortable shooting position while improving visibility.

A specialized “Skeet” trigger is standard on the skeet models and optional on all 12 gauge frames.

New DTS trigger system with two trigger pull weight options, take up, over travel, and length of pull adjustments.

Optional factory selective release triggers available in single and double release.

Interchangeable trunnions and locking lug.

Interchangeable fore-end inserts allows the action to be tightened.

Maxis choke system with conical-parallel design and crowned exit radius for maximum pattern performance. A friction wrench with thread cleaner is supplied.

Vibration dampener

The multi-axis DTS comb allows for the adjustment of: offset, cast, comb height, and comb drop. But adjustability is not helpful unless the system is rugged. The DTS comb hardware is light but extremely simple and strong, designed to stay exactly where you set it.

.735” Maxis oversized bore with chrome lining for optimal ballistic performance.

100% of our barrels are tested and certified for correct point-of-impact regulation.

(Maxis choke system with conical-parallel design and crowned exit radius for maximum pattern performance. A friction wrench with thread cleaner is supplied.)
Webster’s Dictionary defines impact as “The force exerted by a new idea, concept, technology, or ideology”. What is in a name? A name can be nothing more than a fanciful idea or it can have substance and meaning. The Caesar Guerini Impact is designed to change the way a modern clay target shooter approaches the game. The gun is designed to adapt to the shooter and the conditions with a wide range of adjustability. The rib, stock, trigger, chokes, weight and balance can all be easily adjusted to perfectly fit the shooter. Additionally, the higher rib design improves the shooters visibility while reducing felt recoil and allowing the shooter to have a comfortable upright stance. Without a doubt, the Impact redefines the target shotgun.

The Challenger grade engraving has been designed to appeal to the target shooter with an Acanthus leaf pattern on a fine Inglesina scroll background. The result is a bold looking shotgun that stands out in a crowded gun rack. All of the action surfaces are a hand polished coin finish and protected by our Invisalloy™ protective finish for years of carefree service. The stock dimensions are the same as the Summit Impact, but the wood has been upgraded to a deluxe grade of Turkish Walnut and finished with a high sheen oil finish. Additionally, the new Challenger comes standard with the DTS trigger system that reduces trigger pull weight and creep.
The Maxum Impact is designed to stand out technologically and aesthetically on the field of competition. The action features an elegant coin finish enhanced by deep relief Italian Ornato style scrollwork. Many hours of hand engraving by the talented craftsmen from the world renowned Italian engraving house, Bottega Incisioni C. Giovanelli, enhance the finest details. Our Invisalloy™ finish is applied to all external surfaces of the action to provide rust resistance and offer ease of care. Balancing the beauty of the deeply sculpted engraving is a deluxe grade of Turkish walnut, featuring the precision cut 26 lines-per-inch checkering and a natural oil finish that is hand rubbed to a stunning sheen. The Maxum incorporates all of the technical advancements that make the Impact line the most advanced target guns available.

**Maxum Impact**

---

The Impact Sporting features a thin rounded fore-end and light barrels to enhance its natural pointing characteristics. A 20 gauge version is also available with 32” barrels and small gauge tube sets are available for the 12 gauge guns. The 12 gauge version comes in your choice of 30”, 32”, and 34” barrels.

**Summit Impact Sporting**

---

The Impact Skeet is offered with a semi-beavertail fore-end and a selection of 28”, 30” or 32” barrels. The trigger is a hybrid design that combines the best attributes of mechanical and inertia trigger designs for reliable functioning with even the lightest loads. A popular option is the full Skeet set that includes Briley Ultra Light skeet tubes and DTS kinetic balancer, DTS barrel weights all in a customized Americase.

**Summit Impact Skeet**

---

The Impact Trap offers a mid-height rib alternative to our standard trap model at 17mm high vs. 25mm. Amazingly the Impact has the same range of point-of-impact adjustability as our high rib trap guns due to a new rib mechanism. Additionally, there is an unsingle barrel available in a combo set. The Over and Under comes with 32” barrels and the unsingle is offered in 34”.

**Summit Impact Trap**

---

All versions are available in Summit, Challenger, and Maxum grades.
Once the proper rib height and angle is obtained you can choose to lock it into place with a locking screw.

Selective and non-selective triggers are available.

All barrels and frames are nitro proof tested at 19,140+ p.s.i.

5" long dual conical forcing cone for the perfect balance of velocity and recoil reduction.

New DTS trigger system with two trigger pull weight options, take up, over travel, and length of pull adjustments.

Optional factory selective release triggers available in single and double release.

Interchangeable trunnions and locking lug.

Optional DTS Kinetic Balancer system with multiple weights and micro adjustment. The system also includes kinetic recoil reduction and does not need to be removed to access the stock bolt when removing your stock.

20mm ventilated recoil pad incorporating soft rubber compound for recoil absorption.

Vibration dampening bushings.

Left hand and custom stock dimensions are available.

Limited lifetime warranty and free Pit Stop tune-ups.

Maxis choke system with conical-parallel design and crowned exit radius for maximum pattern performance. A friction wrench with thread cleaner is supplied.

The multi-axis DTS comb allows for the adjustment of offset, cast, comb height, and comb drop. But adjustability is not helpful unless the system is rugged. The DTS comb hardware is light but extremely simple and strong, designed to stay exactly where you set it.

The DTS unsingle rib allows the point-of-impact to be adjusted to an industry leading 60/40 to 120% to precisely fit your shooting style. Adjustment is accomplished by simply turning an elevation wheel with positive detents and clear incremental markings.

The DTS unsingle rib allows the point-of-impact to be adjusted to an industry leading 60/40 to 120% to precisely fit your shooting style. Adjustment is accomplished by simply turning an elevation wheel with positive detents and clear incremental markings.

The multi-axis DTS comb allows for the adjustment of offset, cast, comb height, and comb drop. But adjustability is not helpful unless the system is rugged. The DTS comb hardware is light but extremely simple and strong, designed to stay exactly where you set it.

Maxis choke system with conical-parallel design and crowned exit radius for maximum pattern performance. A friction wrench with thread cleaner is supplied.
The Summit is our no compromise competition model. It is designed for the shooter who puts a premium on performance. The extensive list of features all work together in unison, reflecting our goal of making you the best shooter you can possibly be. The DTS (Dynamic Tuning System) allows any shooter to tailor the gun to their individual style. The over-and-under rib adjusts the point of impact from 60/40% to over 100% while the DTS comb system moves four ways; comb height, drop, offset, and cast. The trigger is the heart of a trap gun. We have designed the Summit trigger system to meet the most demanding expectations with adjustable take-up, over-travel, and reach. Another key issue for the serious trap shooter is durability. The Summit is designed to meet the high volume demands of thousands of rounds a year. Oversized locking lug, rock solid ejectors, combined with modular wear points allow the Summit to be a durable and reliable shooting tool.

The Challenger grade engraving has been designed to appeal to the competitive trap shooter with an Acanthus leaf pattern on a fine Inglesina scroll background. The result is a bold looking shotgun that stands out in a crowded gun rack. All of the action surfaces are a hand polished coin finish and protected by our Invisalloy™ protective finish for years of carefree service. The stock dimensions are the same as the Summit Trap, but the wood has been upgraded to a deluxe grade of Turkish Walnut and finished with a high sheen oil finish. Additionally, the new Challenger comes standard with the DTS trigger system that reduces trigger pull weight and creep. The optional factory DTS release trigger is available in both double and single release versions.
With comments like “There is nothing about this gun I do not like”, “Scary how well this gun shoots”, and “Wow! What a dream gun” it is obvious the Outdoor Life Magazine test team feels the same as we do about the Maxum Trap. They felt strongly enough to award it the prestigious 2007 Editors Choice award for best shotgun. The coin finish action is painstakingly hand polished, then engraved with an original design by famous master engraver Dario Cortini. The result is a stunning, deep relief scroll and ribbon, full coverage engraved action that is enhanced by an upgraded extra-deluxe grade of Turkish walnut. The Maxum Trap excels on the trap line too. The Dynamic Tuning System, featuring an adjustable rib and comb system, allows any shooter to customize the gun to their shooting style. As with all of our trap models, the Maxum can be ordered with a factory release trigger and left hand stock as an option.
Stock dimensions are based on 12 gauge. Stock dimensions are approximate and subject to change without notice. All measurements are made with adjustable ribs in the open position.

**SPORTING CLAYS STOCK**
- Breech to Comb: 7.25"
- Drop at Comb: 1.5"

*The choke tubes for the .410 gauge are CYL, SK, IC, M, IM, F.

*All Trap models are 12 gauge.*
Commitment, Passion, and Craftsmanship are the three words that embody the new Caesar Guerini Custom Shop. In our commitment to be the best at what we do Caesar Guerini has created a new state of the art gunsmithing facility and recruited top gunsmiths to serve our customers. We have a passion for exceeding our customers’ expectations by creating new features and services at very competitive prices. Old world craftsmanship still exists at Caesar Guerini, and this dictates we do the job with traditional techniques and workmanship. If you are looking for a special shotgun crafted to your specifications, contact us to speak with one of our gunsmiths.

LIMITED LIFETIME WARRANTY

CAESAR GUERINI U.S.A., LLC, a Maryland limited liability company (the “Distributor”) is the proud distributor of the firearm which you have purchased manufactured by Caesar Guerini s.r.l. (the “Manufacturer”). In our desire to provide you with superior customer service in connection with your firearm, the Distributor wishes to provide you the following extended warranty for your firearm which is, in addition to, and exceeds the Manufacturer’s warranty which you received with your firearm at the time of purchase.

To benefit from this Distributor’s warranty, you will need to complete and return to the Distributor the Distributor Registration Card by certified or registered mail within thirty (30) days of date of purchase.

THE DISTRIBUTOR WARRANTS THAT THIS FIREARM WAS MANUFACTURED FREE OF DEFECTS IN MATERIAL OR WORKMANSHIP WHICH ADVERSELY AFFECTS THE OPERATION OF YOUR FIREARM FOR THE SHORTER OF THE LIFE OF THE PARTS OR THE ORIGINAL OWNER. THIS WARRANTY IS NON-TRANSFERABLE AND IS LIMITED TO THE ORIGINAL PERSONAL RETAIL PURCHASER. SUBJECT TO SUCH LIMITATIONS AS ARE SET OUT BELOW, THE DISTRIBUTOR AGREES TO CORRECT ANY DEFECT IN MATERIAL OR WORKMANSHIP IN YOUR FIREARM WHICH ADVERSELY AFFECTS THE OPERATION OF YOUR FIREARM, AS DETERMINED BY THE DISTRIBUTOR’S TECHNICIANS, BY REPAIR OR REPLACEMENT (AT DISTRIBUTOR’S DISCRETION, AND IF THE FIREARM IS TO BE REPLACED, WITH THE SAME OR COMPARABLE QUALITY FIREARM).

The Distributor does not warrant the wood (stock or fore-end), or metal finish with respect to finish, matching of pieces, dents, scratches, cuts, dings, etc. which are or should be apparent to the purchaser when the product is purchased or which occur after purchase. It is the customer’s responsibility to inspect this particular product prior to purchase to ensure that it is free from defects or damage. This Warranty is effective from the date of the original retail purchase of the firearm.

THE DISTRIBUTOR ASSUMES NO RESPONSIBILITY FOR FIREARM MALFUNCTION OR FOR PERSONAL INJURY OR PROPERTY DAMAGE OR DEATH RESULTING IN WHOLE OR IN PART FROM CRIMINAL OR NEGLIGENT USE OF THE FIREARM, IMPROPER OR CARELESS HANDLING, FAILURE TO PERFORM PRESCRIBED MAINTENANCE AS SET FORTH IN THE USER AND MAINTENANCE MANUAL ATTACHED TO YOUR FIREARM AT THE TIME OF PURCHASE, UNAUTHORIZED MODIFICATIONS, USE OF DEFECTIVE, IMPROPER HAND LOADED, RELOADED OR REMANUFACTURED AMMUNITION, CUSTOMER ABUSE OR NEGLIGENCE OF THE PRODUCT OR OTHER INFLUENCES BEYOND THE DISTRIBUTOR’S DIRECT AND IMMEDIATE CONTROL. THIS WARRANTY DOES NOT APPLY TO NORMAL WEAR AND TEAR OF ANY PARTS, INCLUDING METAL, WOOD, PLASTIC, RUBBER, SURFACE FINISH OR OTHER MATERIALS, OR IF UNAUTHORIZED REPAIR AND/OR ALTERATION HAS BEEN PERFORMED.

THE DISTRIBUTOR’S WARRANTY IS LIMITED TO THE WARRANTY PROVIDED HEREIN AND THE DISTRIBUTOR DOES NOT MAKE ANY IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE DISTRIBUTOR SHALL HAVE NO RESPONSIBILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES OR EXPENSES.

This Distributor’s Warranty cannot be changed except in writing by an authorized officer of the Distributor. Any warranty repair approved to be made to your firearm may only be made by an authorized repair facility. Dealers or gunsmiths (unless they are an approved repair facility) are not authorized to make any repair or adjustment on behalf of Distributor.

If your firearm should require warranty repairs, please contact the Distributor at the contact information on the attached “Warranty Assistance Sheet” and comply with the return instructions set forth thereon.

If your firearm should require warranty repairs, please contact the Distributor at the contact information on the attached “Warranty Assistance Sheet” and comply with the return instructions set forth thereon.

PITSTOP MAINTENANCE PROGRAM

What is it? It is dedication to our customers that is unprecedented in the firearms industry. It is a belief that service does not end when the sale is finished. It is a promise to you that when you invest in a high quality Caesar Guerini shotgun you are going to get service that protects your investment and assures maximum performance from your firearm.

• As the original owner of a Caesar Guerini shotgun you can send your firearm to us once a year for a free service and tune-up. (up to three times)
• Your only cost is shipping.

The PitStop program is a great way to have your gun in top condition for the upcoming hunting or target season.
Caesar Guerini: Brescia, Italy

Caesar Guerini’s modern manufacturing facility successfully combines legendary Italian gunmakers’ craftsmanship with technologically state-of-the-art processes to produce firearms unequalled for their performance, beauty and value. Our penchant for precision and perfection is reflected through the more than 256 inspection points that every firearm passes. Every Caesar Guerini Over and Under is indeed a modern classic, a functional example of Italian art.
